## Global Economics & Market Strategy

### Malaysia Fiscal Balance Improved YoY in 1Q25

- ◆ **Malaysia fiscal balance improved through 1Q25.** Preliminary official data showed the government recorded a budget balance of -MYR21.9bn in 1Q25 (1Q24: -MYR26.4bn). The deficit amount for the first three month of the year was also slower compared to historical data since 2020 (Figure 2). This notwithstanding, the fiscal deficit was marginally higher by 1% at 26% compared to Budget 2025 allocation run rate of 25% as revenue came in slower at MYR72.1bn compared to expenditures MYR94.0bn. Nevertheless, we expect additional revenue enhancement and subsidy rationalization measures would provide an upside to the government's fiscal deficit target of 3.80% in 2025.
- ◆ **Malaysia:** Total government securities volume stood at MYR6,707mn with the top traded stock **MGS 3.955% 9/25** with MYR1,182mn traded. The implied 10YR MGS yield movement today is +1.56bps, given the trailing 30-day beta of -0.26 against UST 10YR (-5.9bps). Bid-ask spreads rose broadly (Figure 3). The 30-day 10YR MGS/UST correlation stood at -0.63. Corporate Bonds volume traded was MYR948mn, with the top traded stock **Danainfra 3.990% 4/29** with a volume of MYR116mn. *\*Every 1 bps move in 10YR UST yield implies a -0.26bps move in 10YR MGS.*
- ◆ **US Treasuries: Treasury rallied as US 1Q GDP revisions were lower-than-expected and weekly jobless claims stood below estimates.** US 1Q GDP second reading and weekly jobless claims of -0.2% and 240k (Bloomberg consensus estimates: -0.3% and 230k). These supported UST gains which unwound the earlier losses seen in London and Asia sessions. The rally was further supported by strong UST 7YR USD44bn auction which stopped through the WI level by more than 2bps. Traders will now look ahead to US Apr PCE print on Friday. UST yields for the 2YR/10YR/20YR moved by -5.1bps/-5.9bps/-5.9bps, respectively.
- ◆ **Key Events - Friday:** US Apr PCE and US May final consumer sentiment survey

## Trading Ideas

- ◆ **MYR Bond: (7/5/25) We are Underperform on all tranches of UMW Holdings Bhd's (UMW) Islamic Medium-Term Notes (AA+) and Outperform its Perpetual Sukuk Musharakah 6.35% - Tranche 1 (AA-).** We think its AA+ paper is pricier and gives lower value across its tranches with the yields stood lower than benchmark and almost at parity to the level of AAA bond curve. Separately, we view the perpetual instrument offers attractive value as well as decent liquidity. The company holds a lion share in terms of total industrial volume sales via Perodua (43.8%) and UMW Toyota Motors (12.5%). Based on adjusted financials, UMW's segmental revenue stood at MYR17.1bn while its pre-tax and interest profit was around MYR920mn for 2024 ([Read here](#)).
- ◆ **MYR Bond: (11/4/25) We keep Outperform on Tropicana Corporation Bhd (Tropicana, A) given the attractive yields, improved gearing levels and strong product pipeline.** Tropicana's strategic focus on divesting non-core assets and reducing its debt burden has yielded positive results. Gearing and net gearing improved to 0.43 and 0.27 respectively versus 0.55 and 0.43 a year ago. In FY24, the Group completed and handed over five development projects in the Klang Valley and Southern Regions, supporting its overall financial performance. For the full year, the Group reported revenue of MYR1.4bn, a 6.3% YoY decline and posted a profit before tax of MYR172.7mn, excluding one-off losses ([Read here](#)).
- ◆ **MYR Bond: (19/3/25) We are Outperform on the subordinated and perpetual securities of CIMB Group, CIMB bank and CIMB Islamic, given its attractive YTM relative to its AAA rated banking peers.** Domestic portfolio is expected to support the group's target loan expansion of 5-7% in FY25. Moving forward, the group's strategic target includes: revised ROE of 11.0%-11.5%, CIR of around 45%, dividend payout ratio of 40%-60%, CET1 ratio around 13.5% and lowering of its cost of funds by 10 to 20 bps by 2030 ([Read here](#)).

## MGS/GII

- ◆ Our expectations of an unchanged OPR of 3.00% in 2025 with the Fed Funds Rate normalisation to continue in 3Q25 means the 10YR MGS should trade at a slightly lower bound above the OPR versus recent averages at around 3.70% to 3.80% in 2025.
