Chapter 23

SUSTAINABLE AND RESPONSIBLE INVESTMENT LINKED (SRI-LINKED) SUKUK

23.01 This chapter sets out the additional requirements for an issuance of a sustainable and responsible investment linked (SRI-linked) sukuk.

23.02 For the purpose of this chapter, SRI-linked sukuk refers to sukuk where–

- (a) the financial or structural characteristics, or both the financial and structural characteristics of the sukuk vary depending on whether the issuer meets the predefined sustainability targets; and
- (b) its issuance complies with the requirements under these Guidelines.

23.03 An issuer must not–

- (a) use or adopt the term “SRI-linked sukuk”; or
- (b) hold itself out as an issuer of such SRI-linked sukuk,

unless the issuance of the SRI-linked sukuk meets the requirements as set out in paragraph 23.02 above.

23.04 An issuer of a SRI-linked sukuk must establish policies and processes to ensure compliance with the SRI-linked Sukuk Framework as set out in this chapter.

23.05 The information relating to the issuer and the details of the issuer’s SRI-linked Sukuk Framework must be made publicly accessible via a designated website to be disclosed by the issuer. Such information in the designated website must be made available at the point of issuance and throughout the tenure of the SRI-linked sukuk.

23.06 Where a public company is an issuer as mentioned under subparagraph 4.01(f)(ii), all requirements applicable to the issuer in these Guidelines shall also apply, where applicable, to the obligor.

SRI-linked Sukuk Framework

23.07 The core components of the SRI-linked Sukuk Framework are as follows:

- (a) SRI-linked sukuk characteristics;
- (b) Selection of Key Performance Indicators (KPIs);

- (c) Calibration of Sustainability Performance Targets (SPTs);
- (d) External review; and
- (e) Reporting.

A. SRI-linked sukuk characteristics

23.08 An issuer must ensure that a SRI-linked sukuk is structured in a manner that its financial or structural characteristics, or both its financial and structural characteristics, vary depending on whether the issuer meets the predefined sustainability targets during the tenure of the SRI-linked sukuk.

Guidance to paragraph 23.08

The variation in the financial or structural characteristics, or both its financial and structural characteristics, should commensurate and be meaningful.

For example, the SRI-linked sukuk is structured such that the profit rate of the SRI-linked sukuk payable to sukukholders would be varied if the issuer fails to meet the sustainability targets.

The variation to the profit rate should commensurate and be meaningful after having considered the original profit rate payable had the issuer achieved the sustainability targets.

B. Selection of Key Performance Indicators (KPIs)

23.09 An issuer must select KPIs that the issuer intends to use as its sustainability targets.

23.10 An issuer must select KPIs that, among others–

- (a) are significant to the issuer’s sustainability and business strategy;
- (b) address relevant environmental, social or governance (ESG) challenges in the issuer’s industry; and
- (c) are within the issuer’s control.

Guidance to paragraph 23.10

The KPIs selected should be—

- (a) relevant, core and material to the issuer’s overall business, and of high strategic significance to the issuer’s current and/or future operations;
- (b) measurable or quantifiable on a consistent methodological basis;
- (c) externally verifiable; and
- (d) able to be benchmarked as much as possible using an external reference or definition to facilitate the assessment of the SPT’s level of ambition.

23.11 An issuer may select any previous or existing KPIs that the issuer has set for itself subject to the following:

- (a) The KPI must have been made available to the public in any of the issuer’s publications, such as in the issuer’s annual reports, sustainability reports or other non-financial disclosure reports; or
- (b) In the case where the KPIs were not made available to the public, the KPIs’ values must be externally verified to the extent possible, for a period covering at least the three most recent years.

C. Calibration of Sustainable Performance Targets (SPTs)

23.12 An issuer must set out the SPTs, which are measurable targets for improvement over a predefined timeline, for each KPIs.

Guidance to paragraph 23.12

The SPTs selected must be—

- (a) ambitious yet realistic;
- (b) a material improvement in the respective KPIs and be beyond a “Business as Usual” trajectory;
- (c) comparable to a benchmark or an external reference, where possible;
- (d) consistent with the issuers’ overall sustainability, business and ESG strategy; and
- (e) set before, or concurrently with, the issuance of the SRI-linked sukuk.

D. External Review

Pre-Issuance

23.13 An issuer must appoint an external reviewer to assess and provide a report on the issuer's compliance with the requirements under these Guidelines.

Guidance to paragraph 23.13

The external reviewer's report should include–

- (a) the assessment of the relevance, robustness and reliability of the selected KPIs;
- (b) the rationale and level of ambition of the proposed SPTs;
- (c) the relevance and reliability of selected benchmarks and baselines; and
- (d) the credibility of the strategy outlined to achieve the SPTs, based on scenario analyses, where relevant.

23.14 The issuer must make available the external reviewer's report on the designated website.

23.15 The summary of the external reviewer's report and the link to the website from where sukukholders may have free access to the full report, must be included–

- (a) in relation to an issuance by issuers other than a Qualified Issuer, in the prospectus and PHS; or
- (b) in relation to an issuance by a Qualified Issuer, in the PHS and where applicable, the information memorandum.

Post-Issuance

23.16 An issuer must appoint an independent verifier to provide a verification report on the issuer's performance level against each SPT for each KPI.

23.17 The verification must be carried out at least annually, during the predefined timeline for assessing the SPT performance, until after the last SPT trigger event of the SRI-linked sukuk has been reached.

23.18 The issuer must make available the verifier's report on the designated website.

E. Reporting

23.19 An issuer must publish the following information on the designated website:

- (a) An up-to-date information on the performance of the selected KPIs, including baselines, where relevant; and
- (b) Relevant information to enable the sukukholders to assess and monitor the progress or relevancy of the selected KPIs and SPTs including any changes to the issuer's sustainability, business and ESG strategy that may impact the KPIs and SPTs.

23.20 For the purpose of paragraph 23.19, the issuer must publish such information at least annually to allow for a proper assessment to be undertaken by the sukukholders of the issuer's performance in relation to the selected SPTs.

Disclosure Requirements

23.21 For the purpose of disclosure of the details of the issuer and the SRI-linked Sukuk Framework under paragraph 23.05, the following information must be included:

- (a) The rationale and process according to which the KPIs have been selected and how the KPIs fit into the issuer's sustainability and business strategy;
- (b) The detailed description of the potential variation of the SRI-linked sukuk's structure or financial characteristics and the trigger event leading to such variation;
- (c) Description and the issuer's plan to achieve each of the SPTs;

Guidance to paragraph 23.21(c)

The issuer may outline its plan by describing its ESG strategy, supporting ESG governance and investments, and its operating strategy, for example, through highlighting the type of actions that are expected to drive the performance towards the SPTs as well as their expected respective contribution, in quantitative terms wherever possible.

- (d) Motivation for the outlined SPTs and the timelines for the achievement of the SPTs, including the target observation date or period, the trigger event and the frequency of SPTs;

Guidance to paragraph 23.21(d)

Motivation for the SPTs may include the ambition level, benchmarking approaches and consistency with overall strategic planning.

- (e) The baseline or reference point selected for improvement of KPIs as well as the rationale for that baseline or reference point to be used (including date or period);
- (f) The situations in which recalculations or pro-forma adjustments of baselines will take place;
- (g) Fallback mechanisms in case the SPTs cannot be calculated or observed in a satisfactory manner; and
- (h) Any other key factors beyond the issuer's direct control that may affect the achievement of the SPTs.

APPROVED SHARIAH PRINCIPLES AND CONCEPTS FOR SUKUK

The following are approved Shariah principles and concepts for sukuk:

A. Primary principles

- *Bai` bithaman ajil (BBA)* (Deferred-payment sale)

A contract that refers to the sale and purchase of assets on a deferred and instalment basis with pre-agreed payment period.

- *Bai` inah* (Sale with immediate repurchase)

A contract which involves the sale and buy back transaction of an asset by a seller. A seller will sell the asset to a buyer for cash. The seller will immediately buy back the same asset on a deferred payment basis at a price that is higher than the cash price. It could also be applied when a seller sells the asset to a buyer on a deferred basis. The seller will later buy back the same asset for cash at a price which is lower than the deferred price.

- *Bai` istijrar* (Supply sale)

A contract between a client and a supplier, whereby the supplier agrees to supply a particular product on an ongoing basis, for example monthly, at an agreed price and on the basis of an agreed mode of payment.

- *Bai` salam* (Advance purchase)

A sale and purchase contract whereby the payment is made in cash at the point of contract but the delivery of the asset purchased will be deferred to a pre-determined date.

- *Bai` waf a'* (Sale and repurchase)

A contract with the condition that when the seller pays back the price of goods sold, the buyer returns the goods to the seller.

- *Ijarah* (Leasing)

A contract whereby a lessor (owner) leases out an asset to a lessee at an agreed lease rental for a predetermined lease period. The ownership of the leased asset shall always remain with the lessor.

- *Ijarah thumma bai`* (Lease to purchase)

A contract which begins with an Ijarah contract for the purpose of renting out a lessor's asset to a lessee. Consequently, at the end of the lease period, the lessee will purchase the asset at an agreed price from the lessor by executing a purchase contract.

- *Istisna`* (Purchase order)

A purchase order contract where a buyer requires a seller or a contractor to deliver or construct the asset to be completed in the future according to the specifications given in the sale and purchase contract. The payment term can be as agreed by both parties in the contract.

- *Mudharabah* (Profit sharing)

A contract made between two parties to enter into a venture. The parties consist of the *rabb al-mal* (capital provider) who shall contribute capital to finance the venture, and the *mudharib* (entrepreneur) who will manage the venture. If the venture is profitable, the profit will be distributed based on a pre-agreed ratio. In the event of a loss, the loss shall be borne solely by the *rabb al-mal*, unless the loss is due to the negligence or mismanagement of the *mudharib* in managing the venture.

- *Murabahah* (Cost-plus sale)

A contract that refers to the sale and purchase of assets whereby the cost and profit margin (mark-up) are made known.

- *Musawamah* (Negotiated sale)

A contract that refers to the sale and purchase of asset where the selling price of the asset is negotiated between the seller and the buyer, with the cost price not being disclosed or made known to the buyer.

- *Musharakah* (Profit and loss sharing)

A partnership arrangement between two or more parties to finance a venture whereby all parties contribute capital either in the form of cash or in kind for the purpose of financing the said venture. Any profit derived from the venture will be distributed based on a pre-agreed profit sharing ratio, but a loss will be shared on the basis of capital contribution.

- Qardh hasan (Benevolent loan)

A contract of loan between two parties on the basis of social welfare or to fulfil a short-term financial need of the borrower. The amount of repayment must be equivalent to the amount borrowed. It is however legitimate for a borrower to pay more than the amount borrowed as long as it is not stated or agreed at the point of contract.

- Tawarruq (Tripartite sale)

Purchasing a commodity on a deferred price and then selling it to a third party for cash.

- Wakalah (Agency)

A contract where a party authorises another party to act on behalf of the former based on the agreed terms and conditions as long as he is alive.

- Bai` dayn (Debt trading)

A transaction that involves the sale and purchase of debt.

- Bai` muzayadah (Open-bidding trading)

- Wadi`ah yad amanah (Safekeeping based on trust)

Goods or deposits kept with a custodian (who is not the owner) for safekeeping based on trust. The custodian is not allowed to use the deposits nor entitled to any share of the profits.

- Wadi`ah yad dhamanah (Safekeeping with guarantee)

Goods or deposits kept with a custodian (who is not the owner) for safekeeping. When the custodian utilises the deposits, the custodian guarantees the repayment of the whole amount of the deposits or any part of it, when demanded. However, the custodian may provide rewards to the depositors as a token of appreciation in the form of *hibah*.
