Narrowing Fiscal Deficit Supports Bond Market, Standard Chartered Sees MGS Yield Declining In 2027

Standard Chartered expects Malaysian Government Securities (MGS) yields to decline gradually in 2027, supported by continued fiscal consolidation under Budget 2027 and stronger reinvestment demand from domestic institutional investors, although global interest rate pressures and inflation risks could limit gains.

The bank maintained its Neutral duration outlook on ringgit-denominated government bonds, projecting the benchmark 10-year MGS yield to ease to 3.8% by the end of the second quarter of 2027 before declining further to 3.7% by year-end.

However, Standard Chartered revised both forecasts upwards from its earlier projection of 3.4%, reflecting elevated global bond yields, inflationary pressures and relatively expensive valuations in the Malaysian government bond market.

In its rates strategy report following the Budget 2027 announcement, the bank said the government's continued commitment to fiscal consolidation should help contain gross government bond issuance despite a modest increase in net supply. – Business Today

Budget 2027: Malaysia Plans Tokenised Govt Sukuk for Retail Investors

Malaysia plans to open a new avenue for retail investors to buy government sukuk through a blockchain-based initiative. Prime Minister and Finance Minister Anwar Ibrahim announced the tokenised retail savings sukuk initiative during the tabling of Budget 2027 on 9 October.

Under the proposed scheme, investors will be able to choose whether their funds support education, healthcare or social protection for low-income groups. The announcement follows earlier efforts to introduce tokenisation into Malaysia's sukuk market.

In April, Khazanah Nasional priced a RM100 million tokenised sukuk in collaboration with the Securities Commission Malaysia, in a pilot involving institutional investors. The transaction was completed in May, with V Systems serving as the technology platform provider.

CIMB also completed a pilot in August using tokenised deposits to settle RM1.38 billion in tokenised sukuk. The Budget speech did not specify a launch date, minimum investment amount or expected returns for the new retail initiative. – Fintech News

Treasury yields steady as traders wrap up volatile week

Treasury yields were steady on Friday as investors wrapped up a volatile week that saw fresh 24-year highs on longer-dated rates. The yield on the 10-year U.S. Treasury which the main benchmark for mortgages, auto loans and credit card debt was last seen up more than 1 basis point at 5.244%.

The yield on longer-dated 30-year U.S. Treasury notes which tend to move on geopolitical events fell less than 1 basis point to 5.60%. The yield on the 2-year Treasury note, which more closely follows short-term Federal Reserve rate decisions, was more than 3 basis points higher at 4.789%.

The moves come after Treasury yields fell during the previous session. The 10-year yield and 30-year yield each hit their highest level since 2002 earlier in the week. On Thursday, the Treasury Department sold \$22 billion in 30-year notes, with indirect bidders — including central banks — taking more than 72% of the auction, above a 10-auction average of 68%. The department on Wednesday sold \$39 billion in 10-year notes.

Federal Reserve Governor Christopher Waller also suggested Thursday that more interest rate hikes may be needed to tackle stubborn inflation, which has stayed above the Fed's 2% target for more than five years. — CNBC
