Today's headlines of interest and summaries as extracted from the international and local media.

MARC Ratings affirms sub-sovereign rating of AAA on Johor

MARC Ratings has affirmed the state of Johor's sub-sovereign credit rating at AAA with a stable outlook. This is an unsolicited rating based on public information. The rating reflects the state's disciplined fiscal management, sizeable economy that is broadening into higher value-added activities, and stable political environment.

Johor is one of Malaysia's largest state economies, contributing 9.8% of national gross domestic product (GDP) in 2025. The state's economy expanded by 8.0% in 2025 (2024: 6.5%), outperforming the national growth rate of 5.2% and bringing its real GDP to RM170.9 billion.

The services sector remained the principal driver of growth, expanding by 9.9% in 2025 and accounting for 54.8% of state GDP, led by the expansion of data centre and digital infrastructure capacity.

Johor's proximity to Singapore continues to generate spillovers in trade, investment and services, now reinforced by the Johor-Singapore Special Economic Zone (JS-SEZ). Approved investments reached a record RM110.0 billion in 2025, the highest among Malaysian states, with about RM77 billion concentrated within the JS-SEZ footprint. – MARC Ratings

Today's headlines of interest and summaries as extracted from the international and local media.

SC expands capital market financing access to Sabah's MSMEs

The Securities Commission Malaysia (SC) is expanding capital market financing access for micro, small and medium enterprises (MSMEs) and mid-tier companies (MTCs) in Sabah. The initiative aims to support business expansion and growth by providing access to financing options, from early-stage funding to public listings.

SC chairman Datuk Mohammad Faiz Azmi said the initiative supports the SC's Capital Market Masterplan 2026-2030, which aims to build a more inclusive and resilient capital market.

"We have seen this reflected through MyCIF, which has catalysed RM7.7 billion in fundraising for more than 11,500 MSMEs since 2019 as well as NIMP CoSIF, which has facilitated over RM243 million in public-private fundraising since its launch last year.

"These initiatives demonstrate how market-based financing can support businesses at different stages of growth," he said at the Kembara Borneo-Sabah roadshow themed "Enterprise to Expansion" today. The one-day event was graced by Sabah Deputy Chief Minister and Finance Minister Datuk Seri Panglima Masidi Manjun. – New Straits Times

10-year Treasury yield dips as traders look ahead to Thursday economic reports

The 10-year Treasury note yield fell on Wednesday after jumping earlier in the day as traders awaited more inflation data due out Thursday. The yield on the 10-year Treasury note — the benchmark for mortgages, auto loans and credit card debt — slid more than 2 basis points to 5.19%.

Earlier in the day, yields had climbed in reaction to a stronger-than-expected September consumer price index report. The longer-dated 30-year U.S. Treasury yield — which tends to react most to geopolitical events — was down more than 4 basis points at 5.517%.

The 2-year Treasury yield — which closely tracks the Fed's interest rate decisions — gained more than 1 basis point to 4.808% after earlier hitting its highest level since Sept. 29. The midday reversal came as equities sold off, with the S&P 500 dropping more than 1%, leading some investors to rotate back into the relative safety of the bond market.

On Thursday, investors will get the September reading for the producer price index, September retail sales data and weekly initial jobless claims figures. For PPI, economists polled by Dow Jones are expecting a 0.6% rise on the month and a 5.5% gain on the year.
